CRIMESTOPPER
SAFETY & SECURITY

This diagram was made to show you how to add the A-DS-101 shock sensor to a single wire input on an EVO-ALL or EVO-ONE.

You will need to turn option "G" on in the flashlink manager to activate the alarm features of the EVO products. Then you will need document guide #12971 to show you what additional wires are used for the alarm wiring.

Following the diagram below will show you how to connect the A-DS-101 to the EVO product

BATTERY

NOT USED

White

Black

Purple

Green

NOT USED

EVO-ALL
RED Wire: 12 Volts Constant
Black Wire: Ground
Purple Wire: External Trigger Input

A-DS-101
RED Wire: 12 Volts Constant
Black Wire: Ground
White Wire: Not Used
Green Wire: Trigger Output
